### About me :

Hello! I'm Melany, a UX/UI designer and Front-end developer. I love combining programming and design to bring amazing projects to life. I'm always striving to push my own limits and learn something new every day. In my opinion, teamwork is key, as it allows us to share knowledge and enrich ourselves with the experiences of others.

### Experience:

#### Front-end

-  **Portfolio Update:**  
(Designed in Figma and built with Next.js)
-  **Online Store:**  
Group project created for the MDP Program course in my city (Mar del Plata). The project involved creating an e-commerce platform for a local business.
-  **Personal Portfolio:**  
Built with React.js using i18n, react-router-dom, framer-motion, react-icons, Tailwind, and Getform. Implementation of useStyles and componentization for cleaner and organized code.
-  Movie App | Weather App | To-Do List | CRUD  
(Personal projects)

#### UX/UI Design

-  **FlickFlow:**  
A movie and series recommendation application that streamlines user search by displaying where they are available on various platforms. It was created in Figma, utilizing Material Design design patterns. (Project for the UI/UX design course at Coderhouse).
-  **Daily UI:**  
It's a UI/UX design challenge that pushes me to enhance my design skills. It's an exciting way to stay creative and continually learn in this field. This time, I used mockups in Photoshop. (Personal project).
-  **Personal Portfolio:**  
My portfolio will be available soon, which I am designing with Figma and will then develop with Next.js. (Personal project).

### Education:

-  Self-taught (always learning continuously)
-  Full-StackMDP Program Course (completed in December 2023)
-  UX/UI Design (Coderhouse, completed in September 2023)
-  OpenBootcamp (Certifications: HTML & CSS/JavaScript, 2022)
-  High school in Communication.

### Skills:

#### Front-end

-  HTML5
-  Css3
-  Sass
-  Javascript
-  ReactJs
-  NextJs
-  Git | GitHub
-  Tailwind
-  Trello
-  Agile methodologies (Scrum)

#### UX/UI Design

-  User-Centered Design.
-  Creation and validation of MVP through a research-based approach.
-  Wireframing and functional prototypes.

#### Tools:

-  Figma
-  Illustrator
-  Photoshop

#### Soft skills

-  Creativity
-  Ability to work in a team
-  Adaptability
-  Empathy
-  Positive attitude

#### Languages:

-  English (Intermediate)
-  Spanish (native)
